Location of the Camp

Position of the Camp points

CAMPING SITE

55 siting places

SHOW CAVE LEDENIKA

Length: 226 m. Depth: 30 (-14; + 16) m

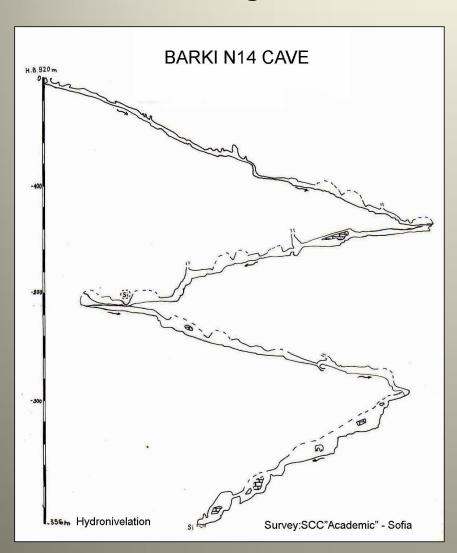

The Caves

As a whole, in the region more than 300 caves were known. More numerous, although smaller are the caves in the eastern part. However, in the western part most of the bigger vertical caves are situated. So far, in Vratsa Mountain there are seven cave potholes and proper potholes over 100 m deep (some of them also of considerable length).

Besides the caves, the river caves, situated close to the big karstic springs, are also interesting. Here the show cave Ledenika is situated.

BARKITE 14

Length - 2600 m; Depth: - 356 m

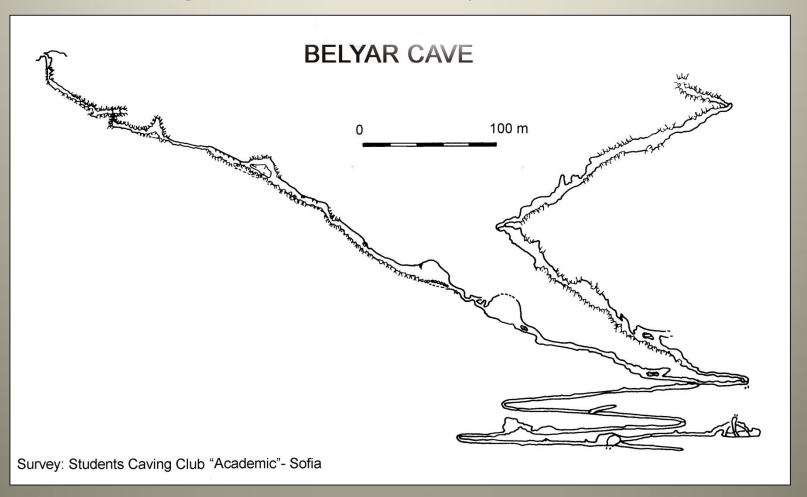

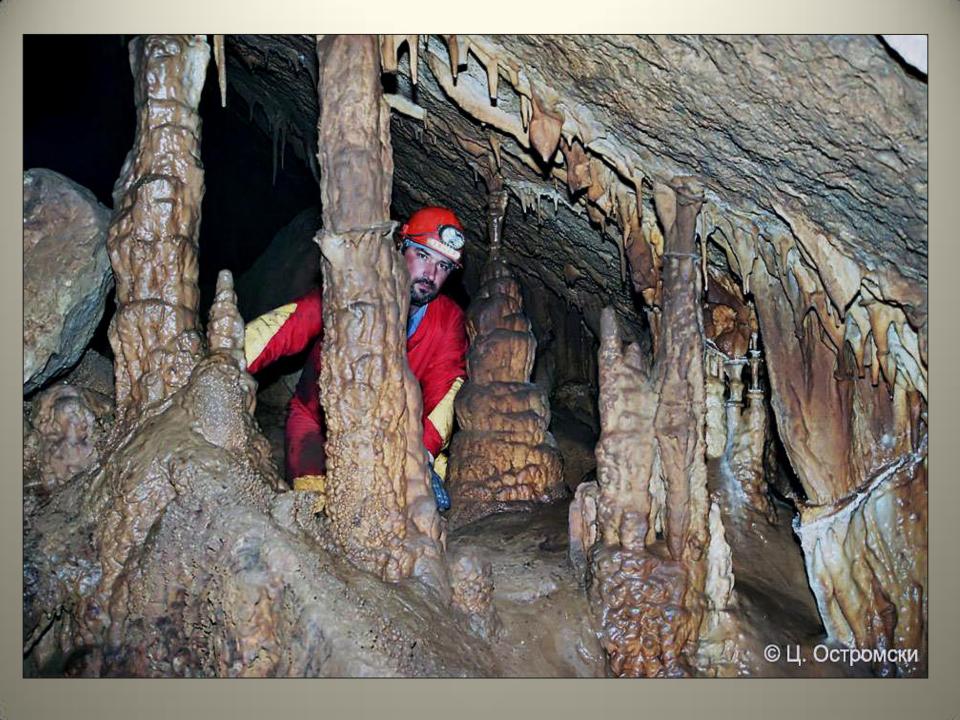

BELYAR CAVE

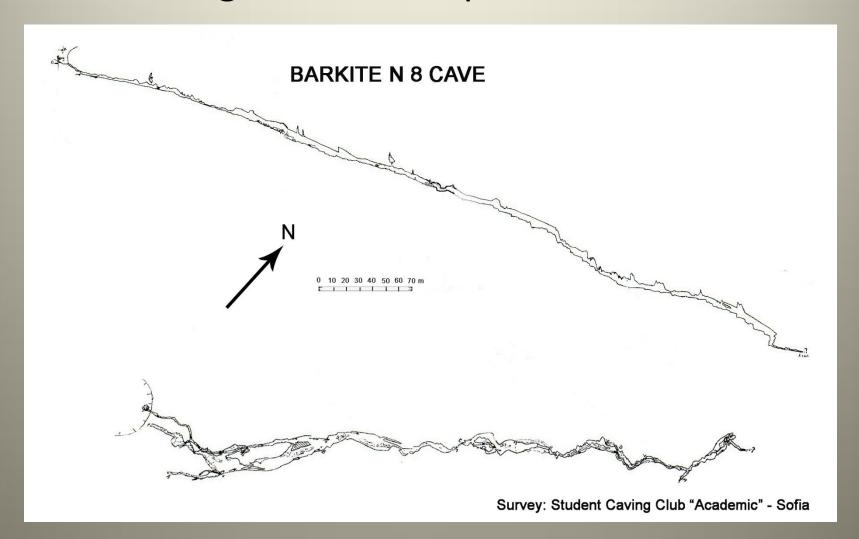

Length: 2560 m; Depth: - 282 m
